Dedicated to Dr. Peter Stambrook

Steven R. Goodman

Editor-in-Chief, Experimental Biology and Medicine, Vice Chancellor for Research, University of Tennessee Health Science Center.
Email: ebm@sebm.org

***Experimental Biology and Medicine* 2021; 246: 2047. DOI: 10.1177/15353702211036636**

This issue of *Experimental Biology and Medicine* is dedicated to a leader in the field of Cancer Research: Dr. Peter Stambrook. I have previously written a very detailed tribute explaining Peter's contributions to Cancer Research, the Society of Experimental Biology and Medicine and our journal *Experimental Biology and Medicine* and I refer reader of this issue to that article (Goodman, S.R. *Exp. Biol. Med.* 248 (1): 1–4, 2021). As you read the article you will find an outpouring of love for Peter Stambrook, the man, from friends and colleagues around the globe. Peter touched the lives of so many people with his kindness, humor, support, and true dedication to helping them develop their careers and succeed in life.

Some of those many friends and colleagues who work in the field of Cancer Research have contributed articles to this issue dedicated to our mentor, teacher, and common friend Peter Stambrook. Here is how I will remember Peter.
